Shock Absorber for BMW R1200 GS, Rear

BM 044

Mounting Instructions

Please note that during storage and transportation, especially at high ambient temperature, some of the oil and grease used for assembling may leak and stain the packaging. This is in no way detrimental to the product, wipe off the excessive oil/grease with a cloth.

⚠ Warning!

Before installing this product, read the Öhlins Owner's Manual. The shock absorber is an important part of your vehicle and will affect the stability.

How to Install

⚠ Warning!

It is advisable to have an Öhlins dealer install the shock absorber.

When installing, read the Vehicle Service Manual.

1

Put the motorcycle on a workstand so that the rear wheel barely touches the ground. The swing arm must be free so that the suspension is unloaded.

⚠ Warning!

Make sure the vehicle is securely supported so that it will not tip.

2

Unlock the seats. Remove the passenger and driver seats.

3

Loosen the silencer and remove it.

👁 Note!

If the motorcycle has the ESA shock absorber system; Disconnect the electrical connectors from the shock absorber. Make sure that the electrical connectors on the motorcycle are safe from contact with water.

4

Remove the lower shock absorber bolt.

5

Remove the upper shock absorber bolt.

6

Remove the original shock absorber from the left side of the motorcycle.

👁 Note!

Before installing the Öhlins shock absorber clean the vehicle thoroughly.

7

Install the Öhlins shock absorber in the same way as the original unit.

👁 Note!

Lower the motorcycle so that the shock absorber is slightly compressed, before tightening the screws.

10

Reinstall the seats. Make sure that all removed parts are reinstalled in the same way as they were before the installation.

👋 Caution!

Make sure that all screws are tightened to the correct torque and that nothing fouls or restricts movement of the shock absorber when the suspension is fully compressed or extended.
