Congratulations, you have just bought the finest air filter that money can buy. With proper care, this filter will last 1 million miles or more. This filter can be used in a stock machine, with no modifications required. If any engine modifications have been made tuning/jetting adjustments may be required. There are special installation instructions, so please follow the procedures outlined below to ensure the K&N air filter seals properly.

### INSTALLATION:

1. Remove the stock air filter.
2. Install the K&N air filter. The round filter opening will be facing down into the air box and will fit around the flange. (fig. 1)
3. Completely seat the K&N air filter. The filter will sit flush in the air box. (fig. 2)
4. Reinstall the air box lid.

**THESE INSTRUCTIONS MUST BE FOLLOWED EVERY TIME THE FILTER IS SERVICED, OTHERWISE THE FILTER MAY NOT SEAL, AND DAMAGE TO THE ENGINE COULD RESULT.**
